

eMark Solutions - Reseller Pro

Pro

- Automated Search engine submission
- Robust SSL Security and site verification by Thawte and Securepay
- Integrate with accounting packages
- Enterprise hosting in a world class environment

In order to choose the right e-commerce solution, you have to ask the right questions:

- Does your e-commerce solution do more than just catalogue your product offerings?
- How can you use the Internet to strengthen supply chain relationships and make your business more efficient?
- Is the solution tailored to the way you do business?
- Do the features benefit your partners?

Reseller Pro opens the possibilities to expand your market. It makes it easier to find new trading partners and to meet the changing needs of existing partners. It enables you to exchange information faster by electronic means.

You will have great flexibility in meeting the demands of your partners, regardless of the industry they're in, the program they use, or the standards they require. You can map data between different formats such as XML, EDIFACT, SAP IDOC and flat files, using an XML standard, which has the support of the industry.

Increased Revenue – Provide around-the-clock, around-the-world access for you and your customers. With Reseller Pro customers can place orders at their convenience, get immediate answers to questions about the status of previously placed orders, or instantly check on inventory availability and pricing.

Reduce Operational Costs – Minimize the time your employees spend on the phone with customers, taking orders, and filling out paperwork. By providing online sales information and processes, that will reduce your overhead costs.

Improved Customer Experience – Save customers time, money, and headaches with a store that's always open and an online system that provides easy to use, accurate product information and order status'.

Empower Your Sales Staff – Enable your sales force to securely place orders over the Internet and review order status, without tying up the efforts of onsite employees.

Reduce Communications Costs – Automate the exchange of sales orders, requisitions, purchase orders, invoices, payments and many other documents internally and externally.

Real Time Reporting – An important component for any business is the ability to report on real time information. The reports engine allows management and staff to run a multitude of reports from current Sales Revenue and Gross Profit to units shipped per day. Choose from over 100 pre-defined reports.
